Skimming and Scanning

To understand the context, you need to skim and scan. You need to learn to skim and scan in order to find key words and make assumptions about the context.

Skimming

Skimming is looking over the entire passsage quickly. Skimming will give you a *general* idea of what the passage is about.

Scanning

Scanning is looking quickly for specific information or types of information. Scanning will help you locate answers to questions, and it will also give you a specific idea of what the passage is about.
